

Customer Value & Renewal Strategy

A 90-day re-engagement plan and executive business review for an at-risk healthcare account.

25%

no-show reduction goal

8 / 25%

current result vs target

6 months to renewal

Nova Health has clear goals but the value gap is widening.

Nova Health is a network of 8 private clinics using our patient scheduling and communication platform. The account is 9 months into the contract, with renewal in 6 months.

Primary contact

Ada Femi

Head of Operations

THEIR TWO GOALS

- 01 **Reduce appointment no-shows by 25%**
- 02 **Get all 32 front-desk staff across 8 clinics active within 120 days**

WHERE THE ACCOUNT STANDS

8%

no-show reduction achieved vs 25% goal

5 / 8

clinics active; Clinics 6, 7 & 8 at zero staff

+14

NPS, down from +51
3 patient-facing complaints this month about text reminders being sent at the wrong time.

Overall health: AMBER — AT RISK

The account has not yet churned nor turned red: usage has not collapsed, NPS remains positive, and Ada is engaged. But the renewal risk is material because results, sentiment and support signals are all deteriorating.

2 / 5	Product Usage	Only 5 of 8 clinics active; Clinics 6–8 have zero staff active.
3 / 5	Engagement	Ada is engaged and has raised ROI concerns, but executive access is limited.
2 / 5	Customer Sentiment	NPS has fallen 37 points, from +51 to +14.
2 / 5	Support Activity	Three complaints this month about incorrectly timed text reminders.

AMBER

At risk

60 more days of inaction would materially increase renewal risk.

Three risks require action at the same time.

01

Reminder timing issue

Three patient-facing complaints report text reminders being sent at the wrong time. The impact on no-show performance needs to be tested rather than assumed.

PRODUCT + SUPPORT

02

Three inactive clinics

Clinics 6, 7 and 8 are not active. Without adoption across the network, the 25% no-show goal cannot be evaluated at full-network scale.

CS + CLINIC MANAGERS

03

ROI is not yet defensible

Ada has flagged twice that senior management is asking about ROI. The account needs an executive-ready value narrative, not a product tour.

CS + SALES + ADA

Days 1–30 · Stabilise the account and establish the facts.

01

STABILISE

DAY 1	Escalate the reminder bug to Product and Support. Call Ada to align on the ROI concerns and the senior management timeline.
DAY 7	Send Ada a written update on the reminder issue: the cause, the owner and the expected fix date.
DAY 8 - 14	• Contact all 3 inactive clinic managers to find out what is blocking adoption. • Share a one-page ROI summary with Ada for senior management.
DAYS 15 - 21	• Follow-up call with Ada. Get her feedback on the ROI summary, confirm when senior management will review it, and share what the clinic managers said. • Turn the blockers into a training plan for each inactive clinic.
DAY 22 - 30	• Confirm the fix date with Product, and agree the training schedule with each clinic manager. • Checkpoint with Ada. If no response, follow up in writing, then escalate to Nova's senior management with Ada informed.

FIRST CALL: WHAT MUST WE LEARN?

- What is senior management specifically asking?
- Who is the budget holder above Ada?
- What caused the 25% gap?
- Why are Clinics 6, 7 and 8 inactive?

30-DAY CHECKPOINT

Technical issue contained + blockers understood + ROI narrative started.

Days 31–60 · Re-engage every clinic and make the data trustworthy.

02 RE-ENGAGE

DAYS 31–55

Adoption training for Clinics 6, 7 & 8 ; All live by Day 55.

DAY 35

First monthly no-show report sent to Ada.

DAY 35

Confirm reminder fix live; 2-week test, zero complaints

DAY 40

All 3 complaints formally closed; written confirmation to Ada.

DAY 40

Sales team sync; align renewal around ROI, not features.

DAY 55 - 60

Per-clinic dashboard shared with Ada and clinic managers.

WEEKLY SIGNALS

- Active clinics
- Staff logins
- No-show rate per clinic
- Reminder complaints

Cross-functional ownership

Support → complaints
Product → fix
Sales → executive / renewal

Days 61–90 · Turn improved execution into an executive value story.

03 DEMONSTRATE
VALUE

DAY 65	Full ROI report compiled — clinic-by-clinic breakdown.	THE EBR Senior management sees the numbers directly — with Ada as a co-owner of the story.
DAY 70	Pre-brief Ada — she co-presents the EBR, not just attends.	
DAY 70	EBR scheduled with senior management; attendance confirmed.	
DAY 78	EBR deck finalised and internally approved.	
DAY 85	EBR delivered; next 90-day targets agreed in writing.	

EBR Highlights - The EBR is built around Nova Health’s goals.

A 5-slide customer-facing story: goals → progress → challenges → next value → agreed actions.

01	Goals & Success Criteria	25% fewer no-shows · 32 staff · 8 clinics · 120-day adoption goal
02	Progress & Results	8% achieved · 17-point gap · Clinics 6, 7 & 8 inactive
03	Challenges & Support	Reminder issue · three inactive clinics · named owners and deadlines
04	What’s Coming Next	All 8 clinics · 15% by day 90, on the way to 25% by renewal · ROI case for senior management
05	Next Steps & Close	Actions, owners, Day 30 check-in, Day 85 EBR, renewal in 6 months

Success means Nova Health can defend the renewal with evidence.

8 / 8

All clinics active; all 32 front-desk staff trained and using the system.

15%

No-show reduction, up from 8%, creating a credible trajectory toward 25% by renewal.

FIXED

Text reminder issue resolved; zero complaints since the fix went live, confirmed stable across sites.

+25

NPS recovered from +14 to +25 heading toward +40 by renewal

EBR

Senior management attended; data-backed ROI narrative delivered directly.

RENEWAL

Proposal submitted and under review by decision-makers.

The target is not a promise of 25% by Day 90. It is a data-backed trajectory toward the contract goal, with every action named, owned and on time.

From account risk to renewal evidence.

Stabilise the experience. Rebuild adoption. Demonstrate measurable value.
